

EOS-700 Sleeving Machine for potted plants

This sleeving machine automatically opens a plastic sleeve to receive numerous types of potted plants such as orchids, athurium and amaryllis including those utilizing ceramics.

This unique apparatus gently controls the descent of delicate plants into sleeves in order to prevent damage. Great results and increased productivity are achieved through effortless and efficient packaging at up to 900 plants per hour.

Sleeves are easily reloaded using the three-sided wicket carousel.

Technical details:

- ◇ Productivity (up to 900 cycles/hour)
- ◇ Compact size: 41"(W) x 44"(L) x 45"(H)
- ◇ Weight: 200 lb
- ◇ Loading stations: 3
- ◇ Stainless steel frame
- ◇ Operates on 220 Volt power
- ◇ Requires compressed air at 44 PSI
- ◇ 4 swivel castors (2 lockable)
