

Mylar Wrapping Machine

The Mylar Wrapping Machine uses elastic strappings or bands to automatically “wrap” pots with Mylar, or “band” bunches of cut flowers and plants.

A wide variety of items such as rose bushes, young grape vines, potted flowers, decorative plants, small trees, asparagus as well as fruit and vegetable plants can be packaged.

It takes little effort for the operator to achieve high output with uniform results. The wrapper is compact, easy to use and mobile.

Technical details:

- ◇ Productivity (up to 700 cycles per hour)
- ◇ Instant effortless wrapping
- ◇ Compact size: 27”(W) x 27”(L) x 37”(H)
- ◇ Weight: 155 lb
- ◇ Operates on 115 Volt power
- ◇ Requires compressed air at 80 PSI
- ◇ 4 swivel castors (2 lockable)
