OFFERING SYSTEMS FOR:

- Transplanting
- Soil mixing and distribution
- Plug tray fillers
- Integrated seeding lines
- Dispensers and fillers for flats and pots
- Plug grading and consolidation
- Planting lines for cuttings
- Watering booms
- Stationary / movable conveyors
- Custom automation
- Labeling equipment
- Rolling bench growing systems
- Rolling bench automation
- Vision grading and shipping systems
- 24 hr. technical assistance
- Installation & service

Specifications:

Soil Capacity:

Standard: .92 cu yd hopper

Optional: 1.11 cu yd extension power feed hopper

Speed: up to 1350 Flats per hour

Container Height: 1 3/16" to 12"

Container Width: 4" to 17 3/4"

Power: 208/230 VAC, 3 phs, 19 A

Weight: 2,860 lbs

Dimensions: 12'- 11" L x 7'-7" W

Features:

- * Actuated blade compactor
- * Compaction roller
- * Spiral finishing brush
- * Pivoting soil guides
- * Standard rolling casters
- * Standard powered outfeed rollers
- * Left hand and right hand models
- * Air blow off kit
- * Hand adjustable compactor, power brush, and conveyor guide rails
- * Variable speed soil elevator and conveyor
- * In-feed buffer area
- * Extended power outfeed rollers for market and web tray filling

Precise filling of containers up to 12" H x 17" W is accomplished using inverter-duty, variable-speed motors to control the flat belt and soil elevator. Soil chain link roller bearings and hardened steel wear plates in the soil hopper prevent premature wear to the chain and hopper bed. 1/8" steel construction leads to long life. A totally enclosed auger under the flat belt and powered roller outfeed returns excess soil to the soil hopper. An extended power outfeed roller section increases the soil return capacity to remove the overfill from open marketing and web shuttle trays. Easy to use, adjustments enable quick changeovers from one container to the next. The KV-M is the complete package: Productive, Flexible, Reliable, and easy to use.
