OFFERING SYSTEMS FOR:

- Transplanting
- Soil mixing and distribution
- Plug tray fillers
- Integrated seeding lines
- Dispensers and fillers for flats and pots
- Plug grading and consolidation
- Planting lines for cuttings
- Watering booms
- Stationary / movable conveyors
- Custom automation
- Labeling equipment
- Rolling bench growing systems
- Rolling bench automation
- Vision grading and shipping systems
- 24 hr. technical assistance
- Installation & service

Specifications:

Load Capacity: 2,200 lbs

Weight: 4585 lbs. with counter-weights.

Engine:

- * Kubota 3 cylinder diesel
- * 1.123 liter disp.
- * 25.5 Hp, 16 mph speed

Dimensions (w/o forks):

- * 7' 8" L x 5' 10" W x 7' H
- * 5' 10" m Lift Height
- * 4' 10" Mast Height

Features:

- * Hydrostatic transmission for smooth, programmable operation
- * Extra wide, non-overlapping wheels for rut free operation
- * High visibility mast for precise placement of pots & trays
- * Zero "0" turning radius
- * Powerful, reliable 3 cylinder Kubota diesel engine
- * Built-in stability system
- * Programmable, automatic "hands-off" pot spacing option

The TRIKE represents a leap forward in forklift technology targeted for the horticulture industry. Engineered with widely spaced front wheels, and closely spaced rear wheels, the TRIKE can traverse even the loosest, most difficult terrain smoothly and without sinking into the surface. WHY? Because the spacing of the large front and rear tires ensures that they don't ride in the same track, keeping rutting to a minimum. Couple this design with a powerful, fuel efficient "Kubota" diesel engine, state-of-the-art hydrostatic transmission, as well as a built-in ride stabilizer for smoothly carrying pots/trays, and we think that the "TRIKE" is changing the game for moving plants around horticulture operations.
